

OUR PROGRAMS

CLASSIC

Summer programs in English and Croatian, taught by native speakers, are our expertise. Our students learn the language through 20 lessons per week and additional afternoon seminars and activities.

SCIENCE

If you're interested in natural sciences, the Science program is for you. It consists of 25 lessons of weekly language lectures and workshops in biology, physics and botany, as well as several laboratory experiments.

ADVENTURE

If you're adventure lover, the Adventure program is for you. It consists of 25 lessons of weekly language lectures and physical activity like snorkeling, kayaking, and jet ski.

MAGIC

If you're interested in Harry Potter, the Magic program is for you. It consists of 25 lessons of weekly language lectures and history, geography and astronomy lessons as well.

ABOUT US

Blue Butterfly Camp is an international language camp that offers students the opportunity to improve their English and Croatian language skills with native speakers.

Our principal, Mrs. Ljiljana Ladika has been in the educational business for more than 29 years. She would be delighted to pass on her experience and her love of language learning to our new students, and that's why we have prepared programs in which everyone can find something for themselves.

By enrolling in one of our programs, you can expect an unforgettable experience that will provide you with not just language knowledge and skills, but also an introduction to numerous scientific subjects, allowing you to get a greater understanding of science and your future educational choices. Also, you will have a spare time, which you can use to connect with other international students as well as learn about these lovely coastal cities.

PROFESSIONAL TEAM

Blue Butterfly Summer programs are held in English and Croatian language and they are taught by native speakers.
